Synopsis

With stimulating questions and discussion problems, comprehensive notes, and teachable and well-edited cases as its hallmarks, this is the authoritative law school casebook for the study of copyright law. The book presents up-to-date materials dealing both with new technologies and with the more "traditional" issues in the field. The increasingly important issue of secondary liability is represented by decisions in the Ninth Circuit and other courts subsequent to the Supreme Court's decision in *MGM Studios, Inc. v. Grokster, Ltd.* The book has similarly amplified the caselaw on the limited liability of internet service providers. The Digital Millennium Copyright Act's provisions on technological protection measures and copyright management information are also covered, through well-selected cases and analysis of successive Copyright Office Rulemakings. A revised and updated chapter on fair use traces the expansion of that doctrine in both the digital and the more traditional contexts. Other expanded topics include the evolving caselaw on copyright ownership and termination of transfers, the increasingly contentious policy issues underlying copyright formalities and the related problem of "orphan works," contractual limitations on user prerogatives, and international issues. There will also be more photographs illustrating current cases dealing with originality and infringement. The casebook will continue its position as the outstanding book in the field-comprehensive and thorough, and stimulating and enjoyable for both teacher and students.

This book is a perfect choice for teaching a copyright law course in any law school. It is very easy to read and to learn from. The authors chose great cases for this book. Would recommend to any professor looking for a casebook to teach their copyright law class with.

I bought this textbook for use in my Copyrights class at law school. In exchange for dealing with someone else's highlighting and note-taking I got to pay a whole lot less for the textbook. So far, after a few weeks of class it seem to be covering the major copyright cases pretty well.

Jane Ginsburg taught my class and she was great
